

Superstore Sales & Profit Analysis

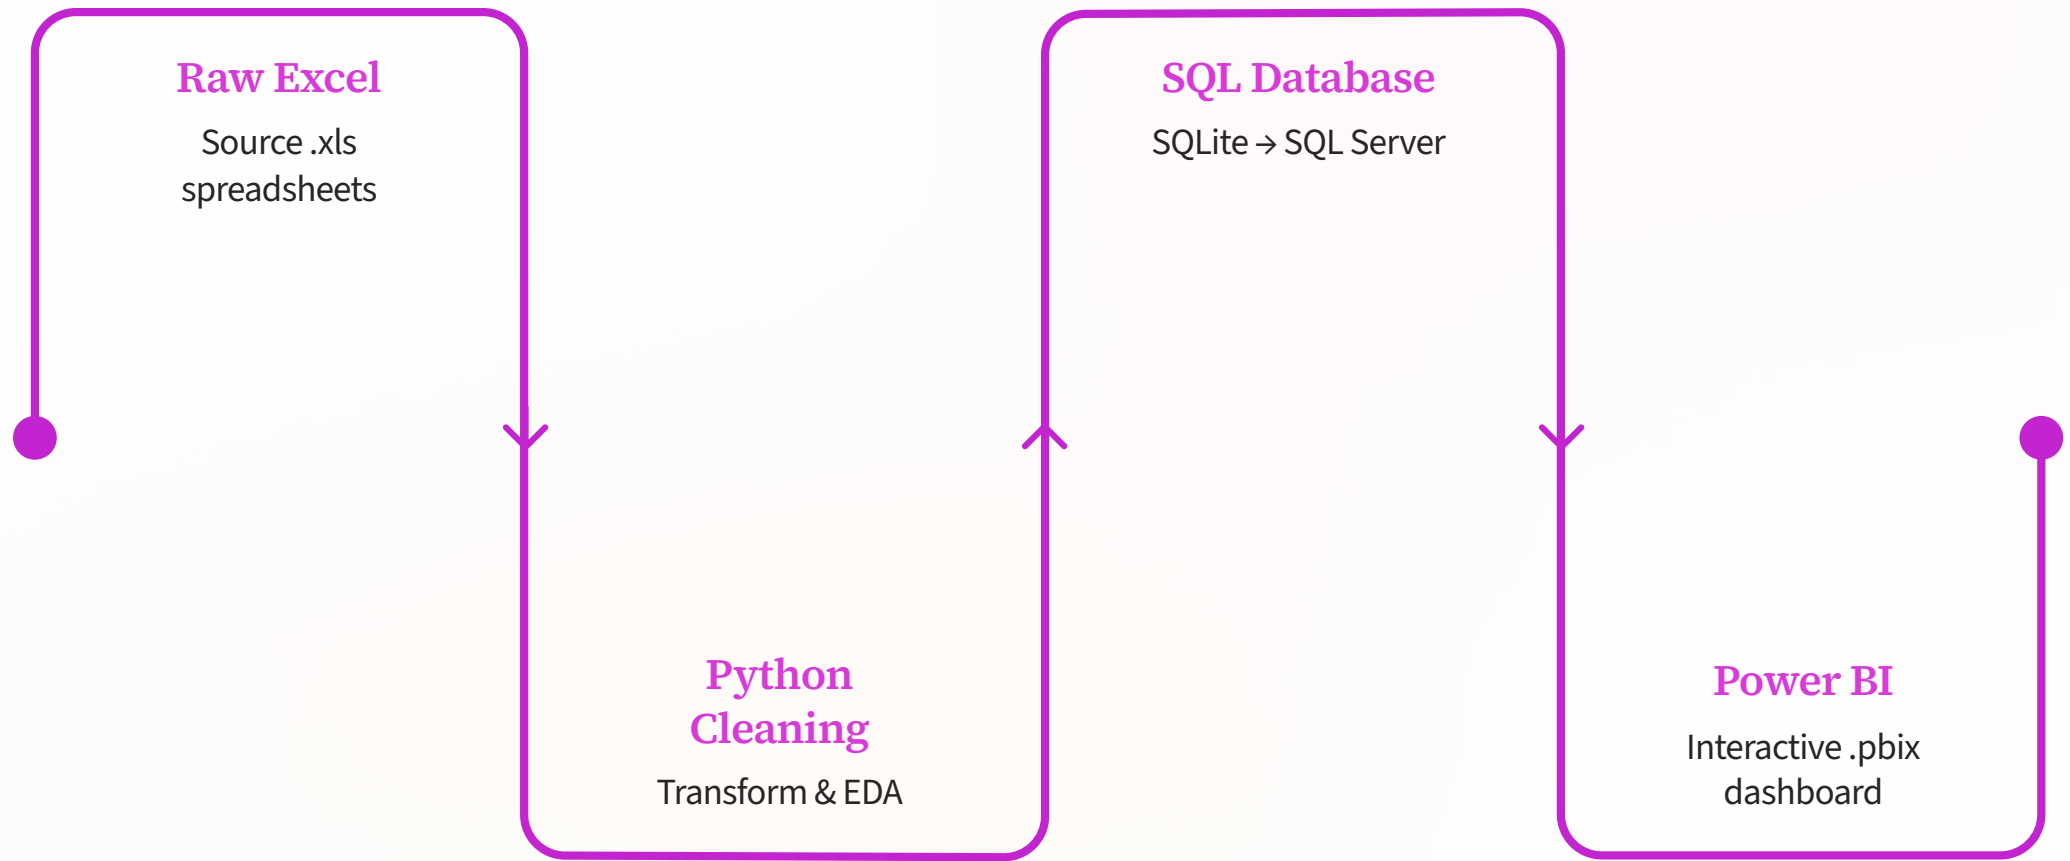

End-to-end analytics pipeline — **9,994 US retail orders**, 2014–2017

PYTHON

SQL

POWER BI

Project Workflow

From raw spreadsheet to interactive dashboard — every step in the pipeline.

Project Files

.XLS → .CSV

Raw → cleaned, 6 engineered features

.IPYNB

Cleaning, EDA, 8 charts, SQL upload

.DB & .SQL

SQLite + T-SQL query library

.PBIX

3-page dashboard, 37 visuals

Executive Overview

\$2.30M

Total Sales

\$286K

Total Profit

12.5%

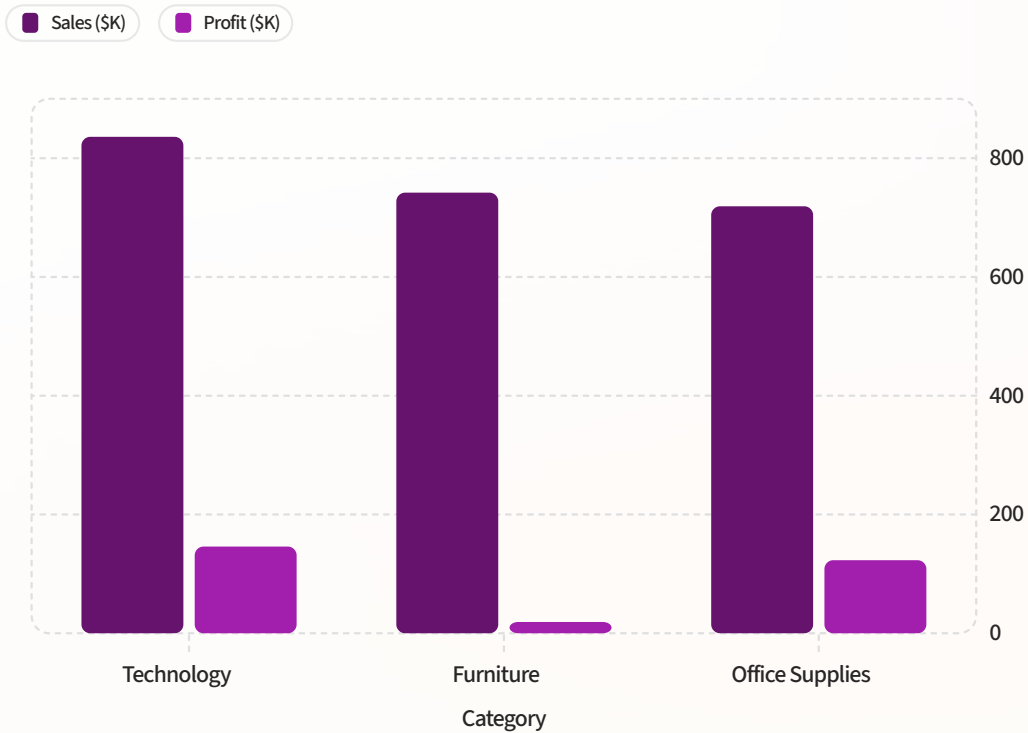

Profit Margin

793

Customers

Sales & Profit by Category

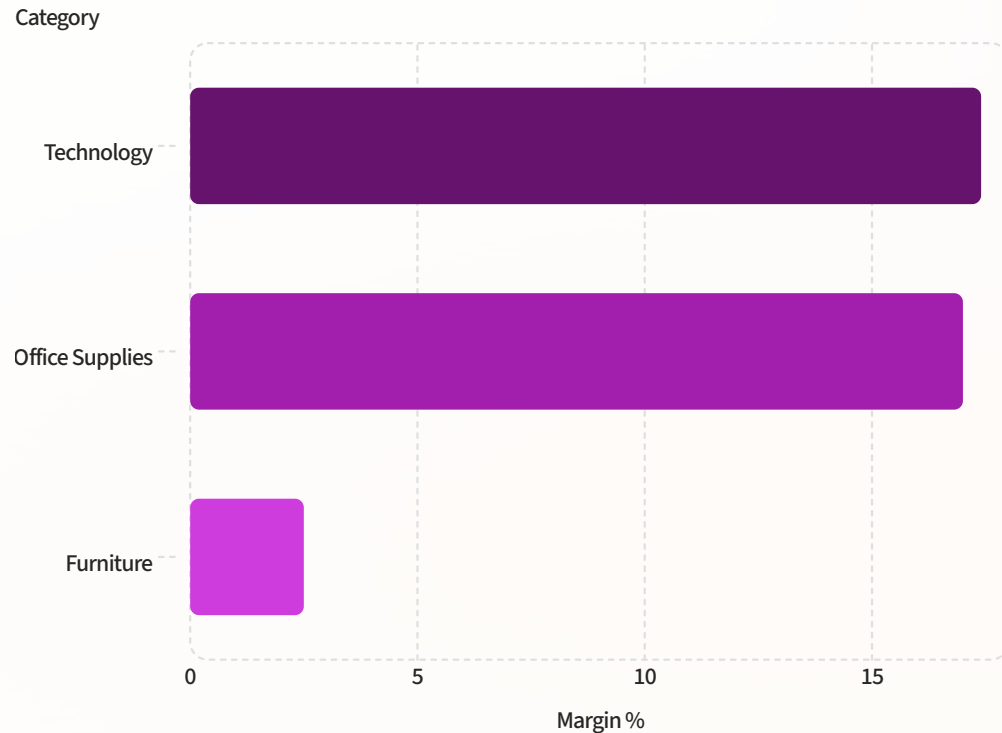

Key Finding

Technology leads in both sales and profit. Furniture generates high revenue but converts poorly to profit.

Profitability Deep Dive

Category Profit Margin

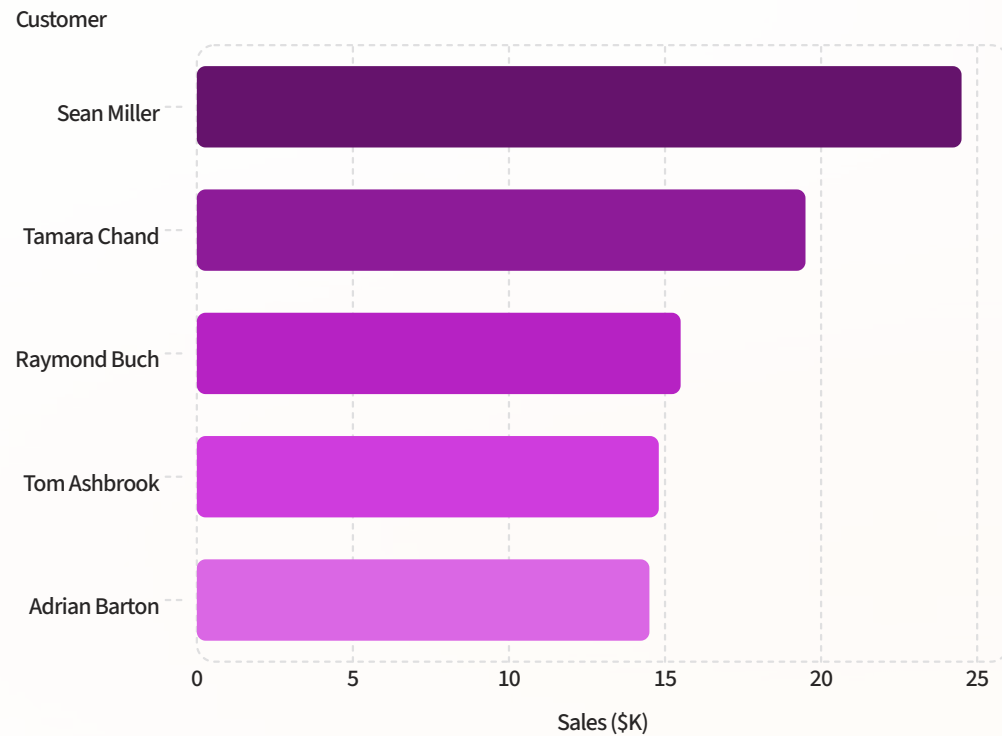

Loss-Making Sub-Categories

- **Tables** — $-\$17.7K$
- **Bookcases** — $-\$3.5K$
- **Supplies** — $-\$1.2K$

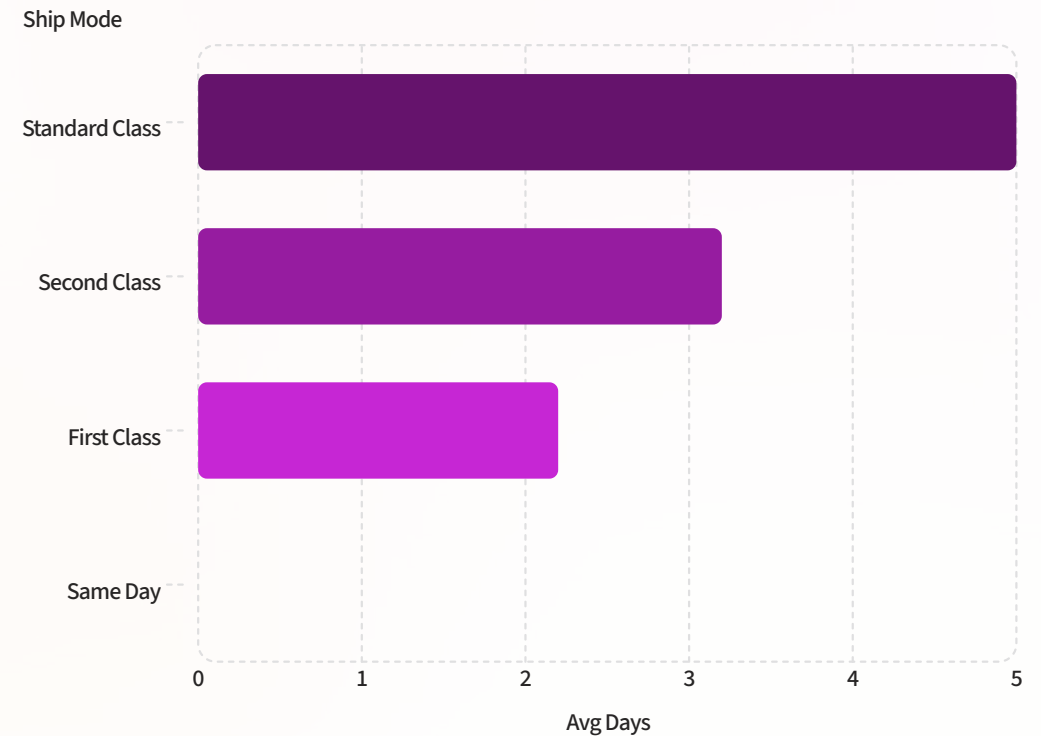

📄 Tables are the single worst sub-category — a repricing candidate.
